

PARASEAL® GM/LG-60 MIL

With Heat-welded Seams

Product Overview

Waterproofing and gas-mitigating sheet membrane consisting of 60 mils of HDPE, expandable granular bentonite and a protective layer of spun-bonded polyester.

Features & Benefits

- A high-performance, dual waterproofing system with welded seams to create a robust yet flexible waterproofing and gas-mitigating membrane.
- Extremely high chemical resistance with a proven track record of performance in submerged and contaminated conditions.
- 100 percent heat welded seams, fully field tested in accordance with ASTM standards*.
- High tensile and shear strength of primary HDPE membrane provides superior puncture and tear resistance.
- Bentonite layer expands up to 8 times its original thickness, providing a backup layer of protection.
- Large sheet sizes (8' and 17.5' wide x 180') minimize seams and reduce installation time.
- COLA approved (LARR #25425) for shotcrete and cast-in-place concrete in gas and waterproofing applications.
- Tremco Approved Applicator requirement minimizes risk and ensures warrantability of installation.

Get started with Design Assistance from Tremco

Complex jobs such as this often require custom solutions. Tremco CS&W is uniquely qualified to provide job-specific details for even the most demanding below-grade applications. Experienced, knowledgeable Tremco field and technical services representatives in every major market across North America provide assistance with product selection, specifications, system design, testing and on-site support.

ParaPlatinum Warranty Program

Superior product performance deserves a superior warranty

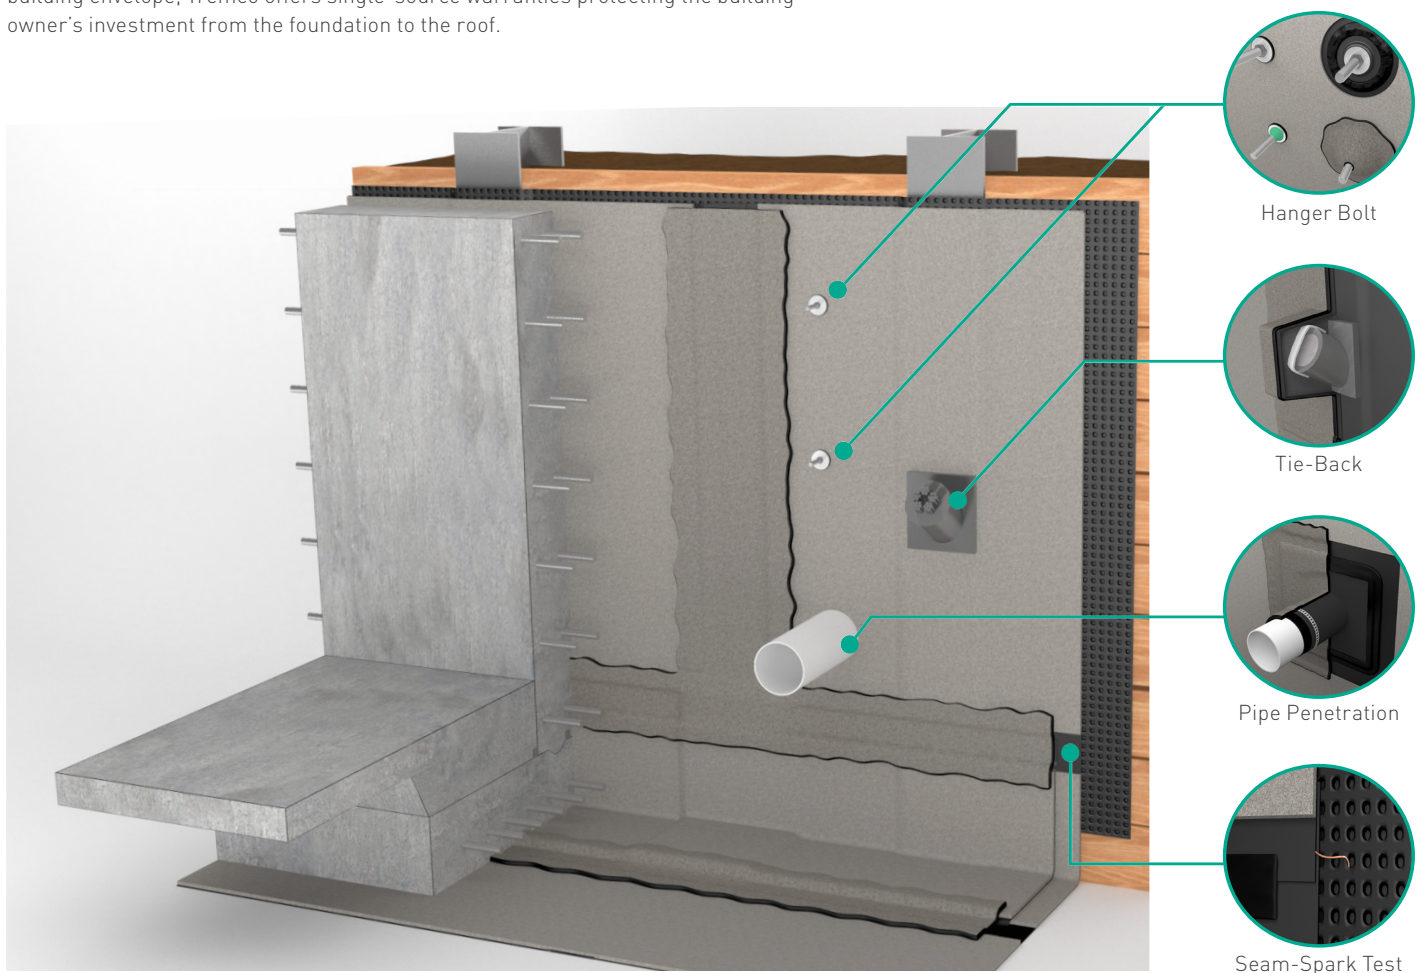

On qualifying projects, Tremco's industry leading Paraplatinum Performance Warranty goes beyond material coverage and ensures long-term performance of our single-source system, minimizing risk and providing building owners with true protection and peace of mind.

This no-dollar-limit, non-pro-rated warranty covers both material and labor at no additional cost, a key benefit given that labor is usually the most expensive component of any project.

Minimize risk with single-source warranties for the building envelope

Founded in 1928 and now a part of RPM International Inc., a world leader in specialty coatings and sealants, Tremco Commercial Sealants & Waterproofing is a financially stable company and North America's foremost supplier of below-grade waterproofing, air barrier systems, traffic coatings, sealants, glazing systems and engineered transition assemblies for commercial construction.

With the ability to make pre-detailed, compatible connections across the entire building envelope, Tremco offers single-source warranties protecting the building owner's investment from the foundation to the roof.
