Structural Glazing Silicones

Two-component in-plant

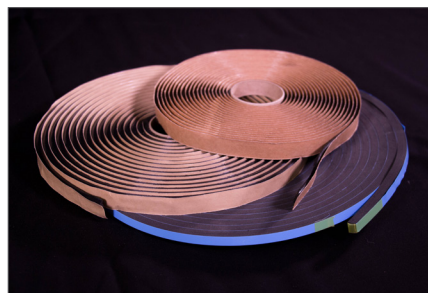

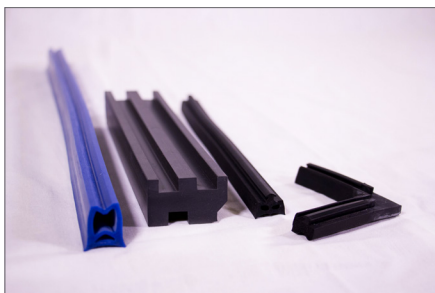

- Proglaze® II — high-modulus silicone sealant for 2- and 4-sided structural glazing
- Dispensing program options available

Single-component

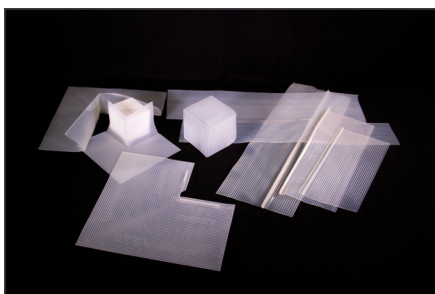

- Spectrem® 2 — medium-modulus silicone sealant for 2-sided structural glazing
- Proglaze SSG — high-modulus silicone for 2 and 4-sided structural glazing
- Full range of weatherseal silicones available

Extruded Rubber Products and Glazing Tapes

- In-house design and manufacturing of silicone, EPDM, silicone compatible rubber, rigid, and dual durometer gaskets, all compatibility tested with our glazing tapes and silicone sealants
- Vulcanized corners, molded parts and other glazing accessories
- Structural glazing and butyl tapes

Transitions

When your project has complex connections at the window-to-wall interface, Tremco is a resource for your installer, providing solutions for these critical details.

- Proglaze ETA (Engineered Transition Assemblies) - Proven, patented solution, tested for performance
- Project-specific design, detail drawings, and job-site support
- Detailed installation instructions
