

THE **TREMCO**™ DIFFERENCE

SUPERIOR TECHNOLOGY. AN INDUSTRY-LEADING WARRANTY.

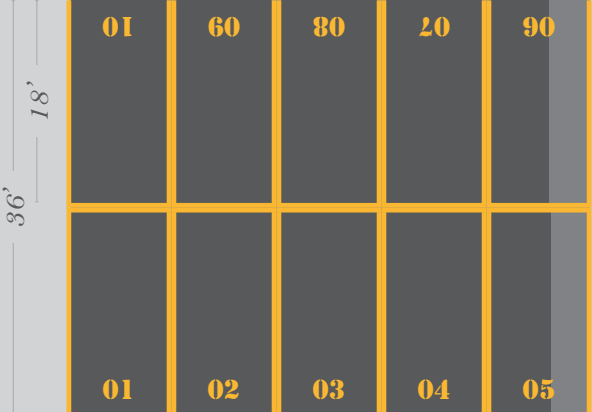

Vulkem® Extreme Wearing System (EWS) is a waterproof traffic deck coating system that utilizes polyurethane-methacrylate (PUMA) technology. Vulkem EWS with PUMA Technology provides tenacious adhesion and extreme abrasion resistance for extended service life. It can be opened to traffic in as little as one hour to minimize disruption.

The Vulkem® EWS with PUMA Technology Difference:

- Superior elongation for exceptional crack-bridging capabilities
- Extreme abrasion resistance to withstand heavy wear, remaining intact years after other systems fail
- Rapid curing for dramatically reduced project cycle time
- Cold-weather application at temperatures as low as 20 °F (-7 °C)
- Compatible with approved Tremco sealants and other Vulkem® coatings
- Premium system backed by an all-inclusive warranty, with extended term options

THE TREMCO™ DIFFERENCE

SUPERIOR TECHNOLOGY. A SINGLE WARRANTY.

Vulkem® EWS with PUMA Technology is a cold-applied traffic deck coating system designed for waterproofing concrete slabs and protecting occupied areas underneath from water damage. The system provides maximum protection from the damaging effects of chloride, deicing salts, chemicals, gasoline, oils and anti-freeze.

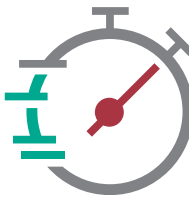

By combining the extreme durability of Methyl-Methacrylate (MMA) and the flexibility of a Urethane, Vulkem EWS with PUMA Technology is ideal for the most punishing parking garage applications including ramps, helical turns and ticket spitters.

Benefits for Contractors

VERSATILE ADHESION

Tremco PUMA Primer has extreme adhesion to almost any substrate, whether new construction or restoration.

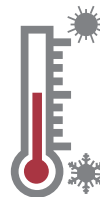

FASTER CURE TIME

Vulkem EWS can be walked on in as little as one hour after installation — Meaning you can take on more (*or bigger*) jobs and finish them faster.

TECHNICAL SUPPORT

Our local technical sales reps work with your installers to find the ideal solution, provide hands-on training, and ensure your project's success.

COLD WEATHER INSTALLS

With installation down to 20 °F (-7 °C), or even 0 °F (-17 °C) with Tremco PUMA Cold Weather Catalyst, weather delays are minimized.

Benefits for Owners/Operators

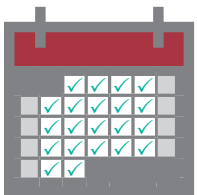

EXTREME DURABILITY

A Vulkem EWS system is designed for maximum durability, with a service life far surpassing that of other competing systems.

AESTHETIC OPTIONS

Tremco's PUMA TC (top coat) is available in 7 standard and 4 striping/helipad colors, and is tintable to 25+ more to closely match your facility.

FAST RETURN TO SERVICE

Quicker curing and fast installation means faster return to service — and less revenue lost to out-of-service parking spaces.

ALL-INCLUSIVE WARRANTY

Tremco stands behind the Vulkem EWS system with an industry-leading, all-inclusive warranty with extended term options.
