VULKEM® 350FC/950NF

Two-Component, Elastomeric, Waterproof
Traffic Deck Coating System

PRODUCT DESCRIPTION

Vulkem® 350FC/950NF is a composite waterproofing system comprised of tough-curing liquid polyurethane. It cures to form a rubber membrane surface that provides a lasting and easy-to-clean coating. Textured surfaces for pedestrian traffic will use an aggregate-laden top membrane to aid in wear and slip resistance. Vulkem 350FC/950NF may be used to apply a seamless, monolithic waterproof membrane to concrete, well-anchored AC plywood, and metal surfaces.

Vulkem 350FC Base Coat is a two-component, fast-curing, VOC-compliant, chemically-curing urethane membrane that bonds firmly to clean, dry, and prepped concrete and metal surfaces. It retains its integrity even if substrate movement causes hair-line cracks of up to 1/16" (1.5 mm). Vulkem 350FC will prevent water migration between itself and the substrate.

Vulkem 950NF Top Coat is an aromatic, low-VOC, two-component polyurethane, which when used in conjunction with the recommended aggregate, creates a tough, aesthetically appealing, skid resistant, wearing surface that forms a strong interlaminar bond to the Vulkem 350FC base coat.

BASIC USES

Vulkem 350FC/950NF is ideal for mechanical rooms and similar interior applications requiring an elastomeric waterproofing system.
