NEWS RELEASE

FOR IMMEDIATE RELEASE

Spectrem[®] 2 High-Performance Silicone Sealant Earns SWRI Validation

CLEVELAND, Ohio (August 11, 2008) ---- In August, Spectrem[®] 2 High-Performance Silicone Sealant from Tremco Commercial Sealants & Waterproofing received validation through the Sealant, Waterproofing, & Restoration (SWR) Institute's Liquid Sealants Validation Program.

The SWR Institute validated that Spectrem 2 when applied to glass or aluminum will withstand +/- 50% cyclic movement, after undergoing the ASTM C 719 Test Method. In addition, SWR Institute validated that Spectrem 2 was tested according to the ASTM C 661 Test Method and earned a rating of 40 for Durometer Hardness.

Spectrem 2 is a medium modulus, one-part, neutral curing silicone sealant. In addition to being ideal for two-sided structural glazing, weather seals and perimeter caulking applications, Spectrem 2 is used for cap, heel and toe beads; and curtain wall or window joints. Spectrem 2 exhibits primerless adhesion to many common substrates and can be used on aluminum, glass, steel, painted metal, plastic, stone, concrete and brick.

Tremco Commercial Sealants & Waterproofing is a world-leading supplier of sealants and waterproofing for the commercial construction industry. Product lines include high-performance silicone and urethane joint sealants; waterproofing membranes; drainage protection; air barrier systems; deck coatings; expansion joints; the industry's only comprehensive glazing systems including silicone sealants, tapes, gaskets, and setting blocks; and a full line of passive fire protection products and systems. With experienced sales

representatives in every major market throughout North America, Tremco is positioned to provide assistance for specification development, application-specific product development, problem-solving and assistance on site. For more information about Tremco Commercial Sealants & Waterproofing and its product lines, go to www.tremcosealants.com.
