

PREBUCK™ KNOCK DOWN PROGRAM

Pre-Cut Engineered LSL Framing

Prebuck™ Knock Down Kits provide contractors the strength and durability of Prebuck, with the added advantage of each unit being cut to length. These kits eliminate the time consuming process of measuring each board, cutting each piece and the waste created. Let Prebuck minimize your on-site labor, reduce employee risks and create less scrap.

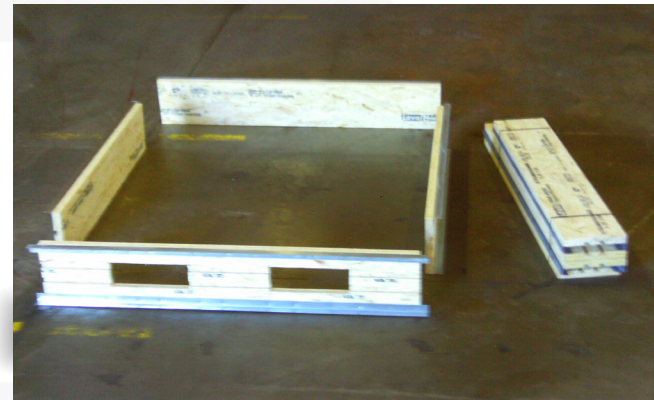

Prebuck is specifically designed for direct contact with concrete and non-corrosive to metals. Prebuck products feature TimberStrand® Strandguard® LSL engineered lumber treated with zinc borate for exceptional resistance to insects and decay. Products also feature MDI resin, the 100% waterproof bonding agent that turns to a durable plastic when cured.

Features & Benefits

- Sized to individual rough opening
- Bundled and labeled by the unit for easy organization on the site
- Palletized and shipped directly to your site
- Custom fabricated window sill to allow placement and consolidation of concrete

Optional

- Pre-cut internal 2x bracing to further reduce labor
- Pre-assembly of Units
- Metal L angle attached for form alignment and support

A Construction Revolution

Prebuck's high-quality engineered solutions, contribute to your project as part of your labor force and help you deliver jobs on-time and in-budget. Developed as an answer for treated framing of concrete and masonry walls, the advantages of Prebuck bucking, caps and sills have been incorporated with virtually all wall types in all segments of construction. Prebuck creates a stronger more robust solution for all termination points on the building.
