Tremco Construction Products Group, Inc. certifies that TREMdri 160 meets manufacturing and quality control specifications, and each batch is individually tested and retain samples are maintained. Tremco manufacturing facilities are certified to ISO 9001:2015.

TREMdri 160 is ICC-ES approved in the United States under ICC-ES 22-13 and is CCMC approved in Canada under CCMC 13067-R. TREMdri 160 is a polymer-modified asphalt emulsion and is designed to stop water from penetrating through below-grade foundation walls, span settling cracks, and provide leak free protection.

TREMdri 160 meets ASTM performance testing for adhesion to concrete (ASTM C 836), elongation (ASTM D 412), low temperature flexibility, crack bridging ability (ASTM C 836), and resistance to degradation in soil (ASTM E 154)
